

Corporate Massage

Corporate massage is a fantastic way to give your staff that needed boost without unnecessary disruption to your workplace.

Corporate massage is a seated chair massage that is provided by a qualified massage therapist. No lotions or oils will be used, this massage is performed over clothing.
(Treatment can be on table-if requested)

Massages can be performed in any workplace providing it is convenient and a quiet space is available. Ideally a quiet room would be used to allow for total relaxation, however a quiet area in a common office space can also be used. If employees aren't able to leave their desks, therapists can perform massages in their own office chairs.

Our therapists are available week days or by request and can visit once a week or once a month, this is at the discretion of the employer. For massage to become most effective in the workplace it is recommended that some level of regularity is met.

Seated massages generally last for 10-15 minutes.
